

HOTEL LIVING SUITES' WIFI IS BETTER THAN YOU MIGHT EXPECT

Ezena A/S has tested the WiFi connection at Hotel Living Suites. The test has been performed on randomly selected areas where hotel guests are located. The results were very positive.

The average download speed was measured at: 210 mbit/s

The average upload speed was measured at: 208 mbit/s

These measurements are better than the average speed in Denmark. The average WiFi speed in Denmark is typically about 80 mbit/s.

The internet connection at Hotel Living Suites is better than you might expect in a hotel and many private homes.
